

The cover art features a dramatic, low-angle shot of a character with long, flowing red and orange hair, looking down with a menacing expression. The character is wearing a dark, armored suit. The background is a fiery, orange and yellow landscape with jagged, crystalline structures. In the center, a small, ornate structure resembling a throne or altar is visible. The title "MAKAI KINGDOM" is prominently displayed in a stylized, metallic font, with "Chronicles of the Sacred Tome" written below it in a smaller, simpler font. The overall tone is intense and action-oriented.

- 4 After you select a job class and name your character, distribute the bonus points to improve their stats. Also, know the characteristics of each job class to effectively combat enemies.

Pram's Makai 101

In the beginning of the game, you may want to focus on quantity over quality with your characters when battling enemies. Also, don't forget to equip your characters with armor and a weapon before you go off to fight!

BEGINNER OVERLORD'S GUIDE TO BATTLE TACTICS

How to move

- 1 First, place the cursor on a character and press the X button. If the cursor selects multiple characters, then press the select button.
- 2 The selected character will display a red circle representing movement range. Now select [Move] from the command menu to move the character.
- 3 Move the character around with the left analog stick. Decide where to move and press the X button.
- 4 You can move the character at any time, as long as the [Move] circle is displayed. Now comes the fun part. How to attack enemies!

How to Attack

- 1 First select the character you want to move and press the X button.
- 2 A red circle will appear to represent the range.
- 3 Select [Attack] from the menu and press the X button.
- 4 If you want to attack immediately, open the command menu by pressing the Δ button and select [Execute].
- 5 Unlike [Move] you can only [Attack] once per player turn. Therefore, choose your attacks wisely. When you have completed all of your commands, open the command menu and select [End turn].

Pram's Makai 101

You can move as many times as you want, as long as you have enough movement range left. However, you can only execute one "attack" per character per player turn.

after you have selected your attack move, you can not move your character until either you cancel or finish the attack move.

How to Lift & Throw

- 1 You can use [Lift], if the character is not holding anything.
- 2 Select [Lift up] and choose the object you wish to carry. You can carry either an object or a character.
- 3 Don't forget! You can take the item you are holding back to the kingdom if you beat the stage while holding it.
- 4 Next, how to [Throw]. Strategically throw items and characters to gain an edge in battle. Remember, you can't lift/throw while you are holding something, so you have to unequip the character first.

Out of Bounds

You can throw your friendly characters, enemies, and items out of bounds. Out of bounds is anywhere on the area map where terrain does not exist. Enemies and characters tossed out cannot return to the battle.

Battles within facilities

Battle enemies within a facility by throwing your character inside. Characters you throw inside will automatically fight for you.

Pram's Makai 101

You can move your red "Attack" circle around to target an enemy by holding down the square button and moving the left analog stick.

Stage Score

The stage score represents the number of points you need to clear the stage. Check out the [Score] on the bottom right of the screen.

The # on the right represents the total score required to clear the stage. You earn stage points by defeating your enemies.

Pram's Makai 101

Destroying all your enemies doesn't necessarily mean the end of the stage. Check out the explanation on "Extension" for more details.

Extension

When you throw an item off the map, it becomes O.B. However, depending on where you throw the item, an extra hidden map called [Extension] will appear. Extensions will also appear by defeating or destroying key items and characters.

Extension maps can be used to train your army. The more extension maps you find, the stronger the enemy becomes, so watch out.

Pram's Makai 101

If you want rare items, you better go find extension maps.

You will level up by defeating enemies and gaining experience points. When a character levels up, his/her status will increase.

*Experience points are given to the character that defeats the enemy.

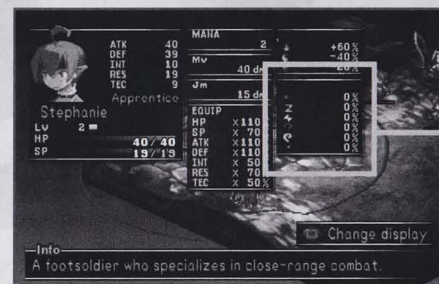

Combo attacks are done by attacking a single target with multiple characters during a single [Execute] command.

The more characters involved in a combo, the more damage it will do. However, you must target a single enemy to execute the combo.

Pram's Makai 101

Destroy key items and characters to find extension maps.

A

LV	Level
HP	Life points. A character will die if his/her HP reaches 0.
SP	Needed to use special techniques. SP can be recovered by using items or going to the hospital.
ATK	Attack power.

RES	Resistance to enemy magic.
TEC	Technique. Affects ability to drive a vehicle and the use of guns.
MANA	Mana power. Needed to write wishes into the sacred tome.

JM	Jumping height.
EQUIP	Equipment qualification. Represents the character's ability to use certain weapons.
	Resistance to fire attacks.
	Resistance to wind attacks.
	Resistance to ice attacks.
	Resistance to ailments.

Qualification shows you how effective the character is at using his/her equipment. You can check qualifications by accessing [Equip].

100% is using the equipment to its maximum potential and 200% is going beyond that. Even the strongest weapon can become a waste if it's being used by the wrong character.

When hit by a skill, a character can receive an abnormal status effect. Abnormal effects can be cured by using the "Esquire" skill.

	STATUS	CONDITION
	Poison	Damage is taken every time the character takes a turn.
	Sleep	The character skips their turn.
	Paralysis	The character's body is frozen: Speed and Movement decrease.
	Amnesia	The character forgets how to perform all but the most basic skills.
	Dazed	The character picks up no EXP.
	Gamble	The next attack will either kill the character, or miss entirely.

During battle, facilities will give special bonuses to your characters. You can build a facility by writing a wish into the sacred tome, but weak characters might die from simply writing in the wish.

Dog House

All characters deployed from the dog house will have all their stats increased by 10%.

Shop

When a character deployed from a shop defeats an enemy, you will gain 50% more money.

Hospital

Every character deployed from the hospital will regenerate 10% of their HP every turn.

School

When a character deployed from a school defeats an enemy, you will gain 50% more experience points. P.S. Enemies deployed from a school will level up every turn.

Effects of Facility

- Units dispatched from a facility will receive extra bonus stats during battle.
- By storing healing items in facilities, you can access them anytime during battle.
- Inviting facilities close to enemies will cause them damage. Caution: You can receive damage, also.

Weapon mastery represents the character's qualification with a weapon.

Every character can use every weapon, but not all of them effectively.

Therefore, you should know which weapons are truly compatible with the character you are using.

Increase the weapon LV to learn new skills.

Weapon LV will carry on to a different weapon as long as it is of the same type.

Instead of using a variety of weapons, you should stick to a single weapon per character.

As you progress through the game, you will be able to build vehicles.

Vehicles are like moving facilities that can attack; however, the number of characters and items that you can store is a lot less.

Place/Get off

You can ride and get off of vehicles by using the "Place/Get off" command.

Controls for vehicles are the same as for characters.

Material System

To repair and upgrade vehicles you need [Materials].

Materials are like money, which you gain through battles. You can also gain [Materials] by exchanging your items for them with the engineer.

Pram's Makai 101

If you want some vehicles in your arsenal, you might want a professor on your team along with an engineer.
